Subject: Investigation of the Secretary General

Dear Carl

As promised I enclose the formal response to your report of "No Action" being taken in furtherance of the safeguarding failure of the Secretary General.

I send this signed by myself and Richard Scorer who represents some of those impacted by the " significant harm" referenced by Prof Glasgow, and, please note, impacted yet again by the cynical avoidance tactics which are apparent here.

For completeness I enclose the email which denies us access to the NCI Policy without which one cannot assess compliances.

Placing these together, one is driven to the conclusion that if one were seeking to devise a structure to obstruct holding senior figures to account it would look precisely like this.

I shall be placing this reply in the public domain immediately. I give you the courtesy of providing it promptly beforehand.

I will provide the list of signatories shortly, but they will not be published. The text will be distributed to interested parties.

I am sorry that the corporate failures and evasions require such robust responses but things cannot continue in this thoroughly disreputable fashion

With personal regards

Martin Sewell
